taste Mineral

wine of Western Cape

body Medium

tasting notes

In keeping with the trend towards fruit driven wines this Sauvignon Blanc displays intense varietal character including gooseberry and fig flavours. The introduction of wine from the cooler Elgin area has ensured greater freshness and vibrancy.

blend information

100% Sauvignon Blanc

food suggestions

It can be enjoyed alone or as an accompaniment to good seafood.

in the vineyard

Most of the fruit (78%) is grown on Villiera making the wines distinctive and unique. The balance (22%) was sourced in the upcoming cooler climate of Elgin, resulting in the wine's origin switching to Western Cape. From the vineyard to the cellar, techniques are utilized that develop and retain the distinct aromas and flavours of the grape varieties used.
